

CONFLUENCE

Job Title: Software Engineer / Build Engineer
FLSA Status: Full-Time/Exempt
Supervisor: Director of Software Engineering

Date: July 26, 2010
Department: Product Development
Job Code: DVP-10-007

Confluence is the global investment management industry's leading provider of automated data management solutions. Confluence helps investment management companies gain unprecedented control by automating the collection, creation, confirmation, and of delivery investment product data. The Confluence Unity™ platform addresses a wide range of problems—from performance measurement to customized reporting—for a full array of domestic and international products, including mutual funds, and variable products, hedge funds, and alternative investments.

Purpose

This is a specialized Software Engineer role at Confluence. The candidate must have abilities of a Software Engineer with added experience in the role of Build Engineer.

A Build Engineer is responsible for creating, maintaining, and enhancing the enterprise build process. This includes managing continuous integration, automation, and application installers.

A Software Engineer at Confluence creates software applications, prototypes, and other technical artifacts for use by other engineers as well as non-technical team members. This person works from functional requirements created by business analysts, and will consult with client representatives, marketing staff and clients themselves to clarify application intent, to identify problems, to suggest changes and to determine required coding. This person also estimates and logs the amount of effort required to perform these tasks for project management.

Responsibilities

- Creates, enhances, and maintains build process of entire software suite.
- Create, enhances, and maintains application installers.
- Initiates and takes responsibility for timely completion of software tasks, initiates alternative task paths or work-around when problems are encountered.
- Plays an active role in system level design, planning and implementation.
- Understands and adheres to the software development process and standards; aids management in their optimization and maintenance.
- Prioritize software tasks and identifies areas of potential software risk.
- Other duties as assigned.

Education and Work Experience

- Very strong analytical and problem-solving skills.
- Programming experience with C#, Visual Basic 6.0, XML, ASP.net, WPF, COM, SOAP, Active X control creation.
- Experience with MS Build and Windows Installer.
- Experience with InstallShield, Visual Build Pro, and Team Build is a plus.
- Proficiency with Microsoft SQL Server and/or Oracle databases.

CONFLUENCE

- Experience with standard programming methodologies.
- Knowledge of design constructs. (UML, Design Patterns, Component-Oriented Design)
- Ability to understand complex business requirements and translate them into efficient software designs.
- Undergraduate degree in Computer Science and minimum of 3 years of programming experience preferred.
- Financial services experience a plus.

Confluence Technologies Inc. is an Equal Opportunity Employer (EOE) and offers employment opportunities to all qualified persons regardless of race, color, religion, sex, age (40-70), national origin or ancestry, physical or mental disability (except where physical or mental abilities are a bona fide occupational requirement), veteran status, marital status, familial status, sexual orientation, HIV-positive status, possession of the sickle cell trait, genetic characteristics, political views, and any other basis protected by federal, state, or local laws.

To apply for this position, please send a cover letter (including job code) and resume.
